

# MAD SABINO MEETING MINUTES

Date: October 05<sup>th</sup>, 2021      Attendees: Miguel Villanueva, Alex Peña, Dawson Hill

## Open Issues

- What will we put on our snapshot slide?
- Who will talk about which parts of the project?
- We will show the full budget and Gantt chart? Or is this just a waste of space?

## What's New?

- Put the finishing touches on all of our documents due today:
  - Budget
  - Project Schedule
  - Design Validation Plan
- Started brainstorming how we are going to present at the first snapshot.

## Before Next Time

- Think about what/how we are going to present our project for the first snapshot.

## Other Notes

- New ideas for calibration of the environment/SABINO
  - Possibly have a 'user profile' for each user
  - Before a user starts any assessment or training, they run through a calibration test for each joint, so we can save a record of what their full range of motion is.
  - This would allow for good/accurate virtual environment interaction.
  - At this point, any ailments of the patient could also be indicated, to help give a better standing of what their capabilities are.

## Next Meeting

October 7th | 8:30 PM @ Discord
